

EDUCATION

• Noida Institute of Engineering and Technology <i>Bachelor of Technology — Information Technology CGPA: 8.9/10</i>	Greater Noida, India 2023 – Present
• SK Public School (CBSE) <i>Class XII — 74.8%</i>	Sonebhadra, India 2022
• St. Joseph’s Convent High School (CBSE) <i>Class X — 87%</i>	Sonebhadra, India 2020

SKILLS

- **Languages:** C++, Python, C, SQL
- **Technologies:** Docker, Kubernetes, FastAPI, REST APIs
- **Tools:** Git, GitHub, VS Code, MySQL, Tableau
- **Core CS:** Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems
- **AI/ML:** Machine Learning, Pandas, Data Preprocessing, Model Evaluation
- **Soft Skills:** Leadership, Team Collaboration, Technical Communication, Decision Making

EXPERIENCE

• GirlScript Summer of Code (GSSoC) <i>Open Source Contributor</i>	Remote Mar 2025 – May 2025
– ML Module Contribution: Enhanced 2 ML conversational modules improving response generation and interaction flow in an AI assistant project.	
– Collaborative Development: Worked with 10+ contributors using Git workflows including pull requests, issue tracking, and code reviews.	
• YBI Foundation <i>Artificial Intelligence & Generative AI Intern</i>	Remote Jul 2025 – Aug 2025
– Weather Data Processing: Built Python workflows using Pandas to process and analyze 1000+ weather records across 5 meteorological parameters .	
– Automation: Developed preprocessing scripts reducing manual dataset preparation by 40% .	

PROJECTS

• C-SHIFT: Carbon-Aware Data Center Scheduler Python, APIs, Docker	Ongoing
– Carbon-Aware Scheduling: Designed a scheduler monitoring real-time carbon intensity (gCO /kWh) and shifting workloads to lower-emission intervals.	
– Distributed Simulation: Integrated energy grid APIs with containerized workloads using Docker to simulate distributed compute nodes achieving 15–25% carbon reduction.	
• JeevanRaksha: AI Powered Healthcare Platform FastAPI, Python, Machine Learning	
– Symptom Analysis Engine: Built an ML inference module evaluating 10–15 symptoms per request to generate preliminary diagnostic insights.	
– Medical Report Analysis: Implemented an NLP pipeline using DistilBERT to extract entities and summarize reports in 3 regional languages.	
– API Architecture: Designed backend services using FastAPI and REST APIs connecting 5 healthcare modules.	
• KrishiDisha: ML Based Soil Analysis System Python, Machine Learning	
– Crop Recommendation Model: Developed a machine learning model using 5 soil parameters for crop and fertilizer recommendations.	
– Data Preparation Pipeline: Implemented preprocessing and feature engineering on 100+ soil dataset samples.	

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate — Oracle
- Cloud Computing Fundamentals — IBM SkillsBuild
- Build Real-World AI Applications with Gemini & Imagen — Google Cloud
- Analyze Sentiment with Natural Language API — Google Cloud
- Create a Streaming Data Lake on Cloud Storage — Google Cloud

ACHIEVEMENTS

- **Research Publication** — Adversarial Honeypots: AI-Generated Deceptive Environments to Trap Evolving AI-Powered Threat Actors, JSIAR 2025
- 1st Runner-Up — AI Impact Global Summit Hackathon
- **Top Team and Best Girls Team Awards** — Google Hackaspace Hackathon
- Participated in **6+ national-level hackathons**, consistently qualifying through competitive online rounds and advancing to **on-site final stages**.
- Vice President — Kalakriti Fine Arts Club, NIET
- House Captain — St. Joseph’s Convent High School
